ABOUT THE MAP

This is a draft map of wireless broadband services available as of June 30, 2010 – including fixed and mobile wireless – but does not include statewide satellite coverage. Service area boundaries were acquired from 7 service providers, but have not yet been verified by other sources and should be used as an estimate only.

This map is the result of an ongoing federal program to collect, verify and map broadband availability information and will be updated every 6 months to improve accuracy and capture changes in service availability. The information on this map will also be reflected in the FCC National Broadband Map.

This map is distributed "as-is" without warranties of any kind, express or implied, including but not limited to warranties of suitability to any particular purpose or use and is intended for use only at the published scale.
